The family is the most fundamental unit of human society. It is the first place where a person learns about relationships, values, trust, love, and responsibilities. A society that nurtures harmony within its families builds the foundation for a peaceful and prosperous global order. In this topic, we will explore how the principles of **right understanding**, **mutual fulfillment**, and **co-existence** help foster a harmonious family and how this harmony can extend to society and the world.

### 6. Moving from Individual Harmony to Universal Order

A harmonious family can contribute to a harmonious society. The progression is as follows:

Level	Harmonious Relationship
Self	Self-exploration, clarity, and peace
Family	Mutual fulfillment in relationships
Society	Justice and respect for social norms
Nature	Co-existence with natural systems
Existence	Understanding universal human values

This progression builds **Sarvabhauma Vyavastha** – a **Universal Human Order** where there is **justice, peace, prosperity, and co-existence**.
